

CLAIMS

What is claimed is:

- 1 1. A method for providing a restaurant supply chain management interface
2 framework, comprising:
 - 3 a) allowing a user to link to a plurality of restaurant interfaces including information
4 relating to at least one distributor;
 - 5 b) displaying at least one distributor link on each restaurant interface, each
6 distributor link capable of linking to a distributor interface including information
7 relating to at least one supplier; and
 - 8 c) depicting at least one supplier link on each distributor interface, each supplier link
9 capable of linking to a supplier interface.
- 1 2. The method of claim 1, wherein the interfaces are written in hypertext mark-up
2 language.
- 1 3. The method of claim 1, wherein the information identifies the distributors and the
2 suppliers.
- 1 4. The method of claim 1, wherein the link includes a hyperlink.
- 1 5. The method of claim 1, wherein the linking requires the entry of an identification
2 code.
- 1 6. A system for providing a restaurant supply chain management interface
2 framework, comprising:
 - 3 a) logic for allowing a user to link to a plurality of restaurant interfaces including
4 information relating to at least one distributor;

5 b) logic for displaying at least one distributor link on each restaurant interface, each
6 distributor link capable of linking to a distributor interface including information
7 relating to at least one supplier; and
8 c) logic for depicting at least one supplier link on each distributor interface, each
9 supplier link capable of linking to a supplier interface.

1 7. The system of claim 6, wherein the interfaces are written in hypertext mark-up
2 language.

1 8. The system of claim 6, wherein the information identifies the distributors and the
2 suppliers.

1 9. The system of claim 6, wherein the link includes a hyperlink.

1 10. The system of claim 6, wherein the linking requires the entry of an identification
2 code.

1 11. A computer program product for providing a restaurant supply chain management
2 interface framework, comprising:

3 a) computer code for allowing a user to link to a plurality of restaurant interfaces
4 including information relating to at least one distributor;
5 b) computer code for displaying at least one distributor link on each restaurant
6 interface, each distributor link capable of linking to a distributor interface
7 including information relating to at least one supplier; and
8 c) computer code for depicting at least one supplier link on each distributor
9 interface, each supplier link capable of linking to a supplier interface.

1 12. The computer program product of claim 11, wherein the interfaces are written in
2 hypertext mark-up language.

1 13. The computer program product of claim 11, wherein the information identifies the
2 distributors and the suppliers.

1 14. The computer program product of claim 11, wherein the link includes a hyperlink.

1 15. The computer program product of claim 11, wherein the linking requires the entry
2 of an identification code.
